

THE FIRST 24 HOURS

Recovery from a fire can be physically and mentally demanding process. A fire is devastating and the hardest part is knowing where to begin to get life back to normal.

The Wainwright Fire Rescue Department has gathered the following information to assist you in this your time of need. We have created this booklet with suggestions on immediate actions that you will need to take and suggestions for future and ongoing processes. This information is intended to give you assistance to help you as you begin rebuilding your life.

THE FIRST 24 HOURS

Protecting Yourself Your Family and The Fire Site

Considerations for immediately after the fire

- Temporary housing;
- Food;
- Medicine
- Clothing
- Other essentials

Contact your insurance agent / company

It will be necessary for you to contact your insurance agent / company as soon as possible.

Cautions

- Please don't re-enter the structure.
- Follow the instructions given by your insurance agent / company representative.
- Your continued safety is our prime concern.
- Utility service (natural gas) and power may have been disconnected to fight the fire in the structure.
- Only have these services reconnected if safe to do so.
Gas reconnection Town of Wainwright 842-3381
Power reconnection Fortis 310- 9473
Telephone service Telus 310-8324

Structure Security

- In some cases it may be necessary to board up openings in the structure caused by the fire. Plywood is suggested for this procedure. This is done to keep trespassers out and to protect the scene.
- If you have any questions regarding re-entering the structure contact your insurance company representative.

THE FIRST 24 HOURS

- Beginning immediately, save any receipts for any money you spend. You may need to show your insurance company what money you have spent related to your fire loss. Each insurance company will have their own procedure related to expenses. Please contact them for clarification.
- If and when it is safe to do so, try to locate the following items:
 1. Identification, such as drivers licenses, birth certificates social insurance cards:
 2. Household insurance information:
 3. Medication information:
 4. Eyeglasses, medications, other supportive devices:
 5. Valuables, such as credit cards, bank books, cash, jewelry:

Temporary Relocation Notification List

Many people and agencies need to be notified if you and your family are relocated for any period of time.

- Do not throw anything away until instructed by your insurance company.
- Itemize damaged belongings.
- Take inventory of damaged items.
- Discuss all plans with your insurance company concerning damaged items.

THE FIRST 24 HOURS

Valuing Your Property

Personal loss is difficult to value. Some key areas that you should target when assembling a list of items lost in a fire and their respective values:

- Costs when purchased: receipts are very helpful in this situation.
- If receipts are not available approaching the store where items were purchased may help determining a value for lost items.
- How long have you owned an item: This can assist in valuing the present day replacement costs.
- Fair Market Value: This is the cost you could have sold the item the day before the fire. The cost would reflect fair market cost minus wear and tear essentially the depreciation cost of the item.

Restoration and Cleaning Services

Several companies specialize in fire restoration services. Inquire with your insurance agent or insurance adjuster about securing as soon as possible this service.

Be clear on ensuring who will pay for this service. Each insurance policy may differ; ask before contacting any such restoration company. Your insurance company may contact a company for you. BE sure to ask who contacts and who pays.

Know your responsibilities before making decisions.

THE FIRST 24 HOURS

THE FIRST 24 HOURS

Salvage Tips and Hints

Professional Fire Restoration companies may your best option for cleaning and restoring your personal belongings. Consult your insurance company for guidance on this process.

Clothing

Before you begin test garments and follow manufactures instruction before using any cleaning product. Many cleaning mixtures described herein this section contain a substance called Tri-Sodium Phosphate also known under the generic name of TSP. This substance is caustic and is commonly used as a cleaning agent. Caution should be followed when using this product and any other products.

Keep out of children's reach and avoid using around family pets. Wear rubber gloves for maximum protection especially if you have sensitive skin. PLEASE ALWAYS READ THE LABEL BEFORE USING.

Smoke odor and soot sometime can be washed from clothing. The following formula may work for clothing that can be bleached:

- 4 to 6 tbsp Tri-Sodium Phosphate;
- 1 cup household cleaner or chlorine bleach: and
- 1 gallon warm water

Mix well, add clothes, rinse with clear water and dry thoroughly.

An effective way to remove mildew from clothing is to wash the fresh stains with soap and warm water, rinse, and then dry in the sun. If the stain has not disappeared, use lemon juice and salt or a diluted solution of household chlorine bleach on the stain.

Cooking Utensils

Pots, pans, flatware, etc. should be washed with soapy water, rinsed and then polished with a fine-powdered cleaner. Copper and brass can be polished with special polish called Brasso, or salt sprinkled on a piece of lemon, or salt sprinkled on a cloth saturated with vinegar.

THE FIRST 24 HOURS

Electrical Appliances

Please Do Not Use electrical appliances that have been exposed to steam and water from firefighting crews. Have each appliance affected inspected and certified by an electrician or appliance repair company prior to using. Steam and water can remove lubricant from internal moving parts and can pose a shock hazard as well.

FOOD

Canned goods can be washed with detergent and water. Do the same for food in jars. Food containers that have been exposed to heat from the fire should be discarded. Cans that have been exposed to heat from a fire may bulge out or be discolored. Inspect each can individually before cleaning.

Do not re-freeze frozen food that has been thawed due to a fire.

To remove odor from your refrigerator or freezer, wash the inside with a solution of baking soda and water, or use one cup of vinegar or household ammonia to one gallon of water.

Baking soda in an open container or a piece of charcoal also can be placed in the refrigerator or freezer to absorb odor.

Rugs and Carpet

Carpets and rugs should be allowed to dry thoroughly, and then vacuumed to collect all loose debris. Cleaning should be accomplished by a company that specializes in carpet cleaning.

THE FIRST 24 HOURS

Leather and Books

Wipe leather products with a damp cloth, and then with a dry cloth. Purses and shoes can be stuffed with newspaper to help retain the original shape of the item. Leather goods should be dried away from a heat source or the sun, allow them to dry naturally. Leather clothing consult with a dry cleaning company to seek advice on care and restorative processes for these types of items.

When leather goods have been dried naturally, you can clean them with saddle soap.

Wet books need to have your immediate attention. The best method to save wet books is to freeze them in a vacuum freezer. This special freezer will remove the moisture without damaging the pages. Finding a vacuum type freezer may be difficult consult with your insurance agent or insurance adjuster about this process, perhaps they can assist in locating this item. In the mean time place wet books in a normal freezer until a vacuum freezer can be located.

Consult with the Librarian at the Wainwright Library 842-2673.

Locks and Hinges

Locks and hinges affected by water from firefighting operations may begin to rust and ultimately seize and not be usable. Oiling and cleaning the hinges and locks will help prevent rusting. By doing this it may help reduce future costs associated with replacement.

Walls, Floors, and Furniture

Soot can be removed from walls, floors and furniture by using a mild soap or detergent solution. Additionally the following solution has proven effective in soot removal:

- 4 to 6 tbsp Tri-Sodium Phosphate
- 1 cup household cleaner or chlorine bleach: and
- 1-gallon warm water.

Please wear rubber gloves when using any caustic cleaning solution, especially if you have sensitive skin. Be sure to rinse your walls and furniture with clean water and dry thoroughly after washing.

Start small; work a small area at first. This process will demonstrate the effectiveness of the cleaning solution. You may have to adjust the strength of the solution or change to a different product depending the results of the area cleaned. Always rinse with clean water and wash ceilings last.

THE FIRST 24 HOURS

Do not paint walls and ceilings until they are completely dry.

Wood Furniture

- Avoid drying your wood furniture in the sun. This process can cause the wood to warp and twist.
- Clear of any mud and dirt thus allowing for complete consistent drying to take place.
- Scrub wood furniture with a stiff brush and cleaning solution.
- Remove drawers let them dry thoroughly so there will be no sticking you replace them.
- Wood will decay and mold if not allowed to dry thoroughly. Assist in ensuring adequate ventilation is present, open windows and doors allowing for increased air circulation. Turn on your furnace or air conditioner, if necessary.
- IF mold should form a solution of borax dissolved in water should be used to wipe down the affected areas. If mold forms consider discarding the furniture. If you do not wish to discard the effected piece of furniture contact the local Health Inspector and seek advice on completely eliminating the mold.

Money Replacement

- If paper money is damaged a local banking institution may replace some damaged bills.
- Avoid handling damaged paper money as much as possible.
- The degree of damage may dictate if each institution will replace it or not. Please consult with your bank for clarification.
- Ensure that both serial numbers are present on the bill.

THE FIRST 24 HOURS

Fire Rescue Department Operations

Common questions about operations to extinguish the fire at your residence

Q. Why are windows broken or holes cut in the roof?

The natural progression of all fire is to travel up and outward. Completing tasks like cutting holes in the roof or breaking windows is to effect ventilation. By quickly and effectively removing the trapped smoke and hot fire gases from the structure allows for firefighters to quickly advance to the fire to extinguish it thus severely limiting potential damage due to the fire.

Q. Why have holes been cut in walls?

This is done to ensure that all areas around the fire's origin and path of travel are completely extinguished. All embers or potential hidden fires masked inside a wall area completely extinguished prior to the fire department leaving scene. This process ensures the fire will not re-kindle.

Q. Do I have to pay for the firefighting services?

No. Firefighting services are funded through the property taxes you pay annually.
